

Cleaning Instructions

Re-Bath Tub & Shower Cleaner is the recommended cleaner for use on Re-Bath products.

Use **ONLY** the Following **Approved Household Cleaners**:

If diluted properly, the cleaners listed below have been tested and found to be safe to use only on the Re-Bath bathtubs, shower bases and wall systems. **IMPORTANT:** When dilution is required, please follow manufacturer instructions on label. **PLEASE NOTE:** Re-Bath / AmBath have not tested the cleaning effectiveness of these products. This may vary depending on the type and amount of soil, water hardness, type of bath soaps used, etc.

Formula 409*	Re-Bath Tub & Shower Cleaner	X-14 Soap Scum & Bath Cleaner*
	Rub-A-Dub Tub Scrub*	Zep Shower Tub & Tile
	Scrubbing Bubbles Automatic Shower Cleaner	

GENERAL CLEANING INSTRUCTIONS:

Use non-abrasive soap and water when possible. Review instructions on cleaner before applying to the installed DuraBath SSP™ material. Never use abrasives. Be sure to thoroughly rinse after each cleaning.

WARNING: Do not use harsh chemicals, abrasives, lime removers, toilet bowl cleaners or any chemicals that have not been approved by Re-Bath / AmBath. Use of these chemicals or abrasives will cause a dull surface and/or chemical crazing or cracking of the DuraBath SSP™ material.

WARNING: The use of Drano or other harsh chemical drain cleaners is not recommended. The preferred method for cleaning is to remove the drain and use a plumber's snake. If chemical drain cleaners must be used, use a funnel and proceed cautiously. If the drain cleaner comes in contact with the liner it will cause permanent discoloration or damage to the DuraBath SSP™ material.

NOTE: Products with an asterisk (*) may cause damage to your glass tub and shower enclosures. Products containing vinegar, bleach, abrasive or soft abrasive powders and liquids, and steel or Teflon pads may damage the metal frame or scratch the surface of the glass.

***IMPORTANT* CLEANING THE SLIP RESISTANT BOTTOM:**

As needed, scrub gently with a soft nylon brush using any of the cleaners listed above. Use straight Palmolive dish detergent on stubborn stains. **Do not** use abrasive brushes or pads such as ScotchBrite® or any other abrasive products.

Light Scratches or Abrasions: Light scratches can be removed and the original gloss fully restored using the following products: **Micro-Gloss, Mirror Glaze, J-Wax Turtlewax, or Kit Wax products.**

Heavy Cleaning or Stains: The following products are safe to use, but are not recommended for regular or routine cleaning purposes. Please use these mildly abrasive products only in the event of staining, or when heavy duty cleaning becomes necessary.

Ajax Mildew & Stain*	Comet Homecare Gel	Comet Cleanser with Bleach*	Soft Scrub*
Ajax Ultra*	Grease Lightening	Comet Crème

WARNING: Do not use harsh chemicals, abrasives, lime removers, toilet bowl cleaners or any chemicals that have not been approved by Re-Bath / AmBath. Use of these chemicals or abrasives will cause a dull surface and/or chemical crazing or cracking of the DuraBath SSP™ material.

WARNING: The use of Drano or other harsh chemical drain cleaners is not recommended. The preferred method for cleaning is to remove the drain and use a plumber's snake. If chemical drain cleaners must be used, use a funnel and proceed cautiously. If the drain cleaner comes in contact with the liner it will cause permanent discoloration or damage to the DuraBath SSP™ material.

For questions regarding product care or to request testing of a specific cleaner, please contact us at 717-299-4822 or call the corporate office at (800) 426-4573. This cleaning list is current as of May 6th, 2008. Please discard any previous versions you may have received. Thank You!

Cleaning Tips for Hard Water

It is estimated that eighty percent of households across the U.S. have hard water. Hard water is water with a high mineral content. Well water is not the only source of hard water, many households with municipal water also experience hard water. You may have a water softener, but they are only effective if you remember to add salt! Hard water leaves mineral deposits behind as it evaporates. Soap does not lather well in hard water and the excess soap forms scum. Hard water is a leading cause of soap scum. The soap scum forms a layer over your shower or tub, and becomes a place for mildew to grow. The following products from our approved cleaning list can be used to fight hard water deposits and soap scum: **Clorox Clean-up, Clorox Regular, Formula 409, Rub-A-Dub Tub Scrub, X-14 Soap Scum & Bath Cleaner, Liquid Comet, and white vinegar diluted 50/50 with water.**

Mildew does not grow on Re-Bath products, but grows on built up soap scum and bio film. Getting behind on hard water deposits and soap scum is an invitation for mildew. If you do get behind, make a paste with baking soda and bleach. Spread the paste on the affected area, and let stand until mildew is gone. Use the products above to then prevent the buildup from occurring again. Our tubs and showers are easy to clean, but they are not maintenance free. Staying ahead of the build-up is the key to keeping your system looking like the day it was installed. Happy Cleaning!
